ExaDigm Announces New GT Cellular Gateway Router

ExaDigm is announcing the release of its latest innovative solution, the GT Cellular Gateway Router.

SANTA ANA, CA – August 10, 2011 – The GT is designed to connect remote terminals such as ATMs, Kiosks, Lottery, and others with a high quality yet cost effective solution. The GT features the innovative capability to replace current dial connections with lower cost cellular connectivity. ExaDigm's unique dial-tone-emulation software allows for simple installation and set up to convert ATMs and other terminals.

Additionally, support for IP, SSL, IPSec security, and serial communications offers the broadest support for cellular connectivity for existing and new terminals.

"Customers have asked for cost effective yet high quality and reliable solutions to replace more expensive landline connections," offers David Graybeal, Vice President of Sales for ExaDigm. "Our commitment to quality and innovative design allows ExaDigm to be the new leader in cellular connectivity solutions."

ExaDigm will be exhibiting the GT Cellular Gateway Router at the WorldPay ATM Distributor Conference September 14th-15th in Atlanta, Georgia and other events around the country.
